

INFORMATION MEMORANDUM

Thar Sun Power (Private) Limited – 150 MW Solar PV Project

Strictly private and confidential. Prepared by the Arranger for discussion purposes only. All parties and figures in this document are fictional.

1. EXECUTIVE SUMMARY

Thar Sun Power (Private) Limited (the **Company**) is developing a 150 MW solar photovoltaic power plant in District Tharparkar, Sindh, Pakistan (the **Project**). The total project cost is estimated at PKR 24,000 million, to be financed through senior debt of PKR 18,000 million and sponsor equity of PKR 6,000 million (debt:equity of 75:25).

The Company seeks a syndicated long-term senior secured facility of PKR 18,000 million. The Arranger invites participating banks to commit a minimum ticket of PKR 2,000 million.

Electricity will be sold to the Central Power Purchasing Agency (Guarantee) Limited under a 25-year Energy Purchase Agreement (EPA) on a take-and-pay basis at a levelised reference tariff of PKR 26.00 per kWh, indexed annually at 3.0%.

2. SPONSORS

The Project is sponsored by Indus Renewable Holdings Limited (70%) and Karachi Infrastructure Partners (30%). Indus Renewable Holdings currently operates 300 MW of wind assets in Jhimpir. Audited financial statements of the sponsors have not been included in this memorandum.

3. PROJECT OVERVIEW

Commercial Operations Date (COD) is targeted for 1 July 2026 following an 18-month construction period. The EPC contractor is SinoSolar Engineering Co. under a fixed-price, date-certain turnkey EPC contract. Delay liquidated damages are capped at 10% of the EPC price. Operations and maintenance will be performed by the EPC contractor under a 5-year O&M agreement.

Expected net capacity factor is 22.0% (P50), with annual module degradation of 0.5%. An independent energy yield assessment has been commissioned but is not yet available.

4. PROJECT COST AND FINANCING PLAN

Uses of funds	PKR million
EPC cost	20,500
Development costs	1,200
Interest during construction	1,800
Financing fees	500
Total project cost	24,000

Sources of funds	PKR million	%
Senior debt	18,000	75%
Sponsor equity	6,000	25%
Total sources	24,000	100%

5. FINANCIAL HIGHLIGHTS (BASE CASE)

Figures below are extracted from the Sponsor's base case financial model (PKR million).

Item	FY2027	FY2028	FY2029
Revenue	7,516	7,703	7,895
EBITDA	6,466	6,580	6,694
Senior debt outstanding (year end)	16,200	14,400	12,600

The base case projects a minimum DSCR of 1.53x and an average DSCR of 1.86x over the loan life.

6. KEY RISKS

Key risks include construction delay, circular debt in the power sector leading to delayed payments by the power purchaser, KIBOR interest-rate movements, PKR depreciation affecting imported equipment cost, and solar resource variability. A sovereign guarantee from the Government of Pakistan is expected under the Implementation Agreement.
